

DAYTON BARNES

& ALL-STEEL BUILDINGS

QUALITY

Building to a higher standard, using enduring materials in traditional ways.

CUSTOMER TESTIMONIAL

“We shopped really, really hard for a building,” says Cabrini Gordon. “and when we saw David’s buildings we could tell they were of so much higher quality than anything else we could find. We could not be happier with our building!”

*Cabrini and Butch Gordon,
Marion County*

- Rafters: 8' - \$7 • 10' - \$8 • 12' - \$10 • 14' - \$12

DAYTON BARNES
& ALL-STEEL BUILDINGS

ALL SHEDS MANUFACTURED BY 5-STAR STRUCTURES IN STOCKPORT, OHIO

DELIVERY AND SET UP ...

We offer free delivery within a 50 mile radius from any of our sales locations. *All buildings over 12 feet wide require a special hauling permit. The charges for these permits will be added to the price of the building at the time of sale.*

The location where the building will sit should be fairly level and free of any stumps, rocks or debris. We recommend putting down a bed of gravel about 3- to 5-inches thick. This will help prevent the building from settling and getting out

of plumb, and can also extend the life of the foundation. If you would like for us to do the gravel, ask your sales rep at the time of purchase.

Make sure we have access and enough clearance to transport the building to its final destination. Please discuss with your sales rep the number of blocks needed to level, if any.

We will level the building upon delivery, and thereafter the customer shall be responsible for keeping it level.
